Combining all your fleet management, gas, credit/debit, invoicing and cash register functions into a single, economical appliance

Looking for the convenience and efficiency of an all-in-one Point of Sale (POS) solution, with functions far exceeding those of a standard payment terminal, at a fraction of the price of higher-end systems? Look no further than PetroPAY, Keycorp's new comprehensive POS system, designed specifically for independent and mid-sized petroleum and auto service retailers.

With PetroPAY – which addresses the need for centralized management and processing of station data – smaller oil and gas businesses can enjoy benefits similar to the large chains, at less than half the cost.

Featuring such increased capabilities as multiple payment types and markets, remote terminal support, enhanced reporting systems, and support for private label, loyalty and fleet cards, PetroPAY is an unprecedented payment and information processor for smaller retailers, delivered in one compact package.

Businesses can now expand their operations by accepting fleet card payment types, a standard feature in

PetroPAY. Enhanced management reporting around fleetcards, including the ability to enforce payment rules for fleet cards, allows small business merchants to operate with the same efficiencies as larger organizations.

Say goodbye to limited credit/debit capabilities, and wasted counter space due to separate credit and debit machines, electronic cash registers (ECR) and personal computers. PetroPAY combines everything an independent or mid-size service centre needs into a single appliance, integrating data from all parts of the business – from gas pumps and service bays, to convenience stores, restaurants, and even lodging.

PetroPAY

How PetroPAY Works

PetroPAY is powered and centrally managed by POSGen, Keycorp's comprehensive terminal management system. The solution is delivered on Keycorp's leading K26 platform, a compact all-in-one terminal and printer, with both dial-up and IP capabilities. With the power of POSGen and functionality of K26, PetroPAY is much more than just a credit and debit card device. Keycorp's solution enables the system to manage a variety of non-financial indicators as well, including pump volume readings, fuel drops, and price changes. It also allows users to easily pull up management reports, set up regional coupon programs, and tailor applications according to their specific needs.

Built using the highest industry standard tools and architecture, PetroPAY is specially-designed for:

Independent oil and gas sites (propane, aviation, truck stops, marinas)

- Credit/debit
- Private label
- Fleet payment
- ECR mode for gas plus item purchase

Mid-size operations/petro chain

- Site close
- Fuel price change management
- Inventory input from pumps and dip readings
- Enhanced reporting
- Supporting fleet cards, loyalty programs

Auto parts/service centres

- Complete credit/debit system
- Fleet card, MasterCard®online, auto club support and management
- Invoice entry, work orders
- Pre-authorization only and completion
- Secure prompting for driver ID#, vehicle #, odometer reading
- Host upload of MIS reports via POSmail

Multiplex Operations (gas plus C-store, restaurant, service bays, or lodging)

- Same benefits as independent, mid-size and auto centre operations, plus features such as tipping, custom reports, and cash tender
- "Always ON" IP connection enables customers to be on their way faster

KEY FEATURES

- Full credit/debit, private label, and commercial fleet card authorization
- Settlement of VISA®, MasterCard®, and Interac® transactions
- Automatic capture of station management data – meter and tank dip readings, dealer commission, gas delivery, price changes, fuel product sold, and bank deposit/cash summary
- Customized receipts printed by product and fuel type, and associated tax information with up to 20-line items
- Comprehensive station reports transmitted via exclusive enhanced management reporting system; Loyalty program can be easily added to build repeat business
- Customizable security at all levels and tabs
- Extensive scheduling and change-tracking features
- Powerful user-friendly GUI with online help

KEY BENEFITS

- Unique petroleum solution delivers card acceptance processing efficiencies, and proven and trusted petroleum application delivers piece of mind to merchants
- No additional set up costs for incorporating new payment methods or existing commercial additions
- Extendible to other POS applications and communications protocols
- Ability to define and manage an unlimited number of POS terminals
- Data upload of statistical, inventory, and diagnostic data for centralized reporting and analysis
- Rapid connection times provided by flexible communication options
- Ability to import externally-defined files for download
- PINPad prompts for MasterCard® fleet cards reduce exposure to fraud and potential charge-backs
- Terminal management software package provides merchants with option to maintain station profiles, and download profiles directly from POSGen
